-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4-12 and 14-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Ooishi et al. (USPN 6,191,994).

With respect to claims 1, 4-12, 14 and 15, Ooishi et al. disclose, in Fig. 1, “a circuit comprising: “a common mode (N4)””; “a power-regulating circuit” including “a current mirror (13a-13x and 14) adapted to provide the operating current (via 11) to the common node” and “a load (12, 17a-17x, 18, 19a-19x, 20) coupled between the common node and a reference supply (N3)” including “a resistive element (12)” and a voltage source (17a-17x, 18, 19a-19x, 20)””; “a stabilizer (Vref 4A and 10)””; and “an output stage” or “input stage” (2B).

Examiner has fully considered Applicant’s remarks for the above rejection and has not found them to be persuasive. Applicant has remarks concerning the “resistive element” and the “stabilizer”. However, the above rejection has be clarified to provide further detail to address Applicant’s remarks. Since, as demonstrated above, the reference to Ooishi et al. teaches a circuit meeting the claim recitation, the rejection is hereby maintained.

Allowable Subject Matter

Claim 13 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 5 would be allowable is amended to include the limitations recited in claims 3 and 4. While element 2B could be considered to be an “input stage” or an “output stage”, the reference to Ooishi et al. does not teach an “input stage” and an “output stage”.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
